RESEARCH EXPERIENCE

Swiss Federal Institute of Technology in Lausanne (EPFL), Distributed Computing Laboratory Research Assistant
Lausanne, Switzerland Sep 2018 – present

- Improved the probabilistic bound on the error of a neural network in case of independent neuron failures
- Conducted experiments to test the improved theory using Keras and Tensorflow including the implementation of custom layers and regularizers

EPFL, Computer-Human Interaction in Learning and Instruction laboratory Research Assistant
Lausanne, Switzerland Sep 2017 – Aug 2018

- Created a library QML-AR for seamless augmented reality using OpenCV with competitive performance on Android and small visual negative impact
- Designed an activity for kids for learning math using AR, tested the application in a classroom setting, analyzed the obtained data

Skolkovo Institute of Science and Technology, Center for Energy Systems Research Intern
Moscow, Russia Sep 2016 – Jul 2017

- Characterized using numerical optimization and theoretically the structure of the set of boundary non-convexities of an image of a quadratic map in case the number of non-convexities is infinite
- Designed and implemented the Convexity Analysis of Quadratic Maps library which gives approximate solutions to a number of problems involving quadratic maps
